

Balance Score Card

Management Control - Mar 2026

Revolut

Company Overview and Strategy

Revolut

The Company

52.5 million customers

30+ countries

£3.1 billion revenue (72% YoY)

£790 million in profits

Strategy

Become the world's first truly global bank by scaling to 100 million daily active users across 100 countries, deepening product engagement to make Revolut each customer's primary financial service provider.

Key Tensions

Growth vs Quality

Revolut suffers from Poor NPS score and Customer Service Issues. Sole Focus on Growth can impact Quality

Lean-ness vs Long-Term

Revolut operates on a lean model with high margins, but cutting people costs can destroy talent capability for long term growth.

Myopic Decisions Risk

- Delay investment in CS
- Squeeze engineering teams
- Deprioritise compliance and ESG
- Chase Volume over Engagement

Strategy Map

Financial

Grow Revenue to £5bn

Improve Net Profit Margin to 30%

Increase Revenue per User

Customer

Become Customer's Primary bank

Reduce Monthly Churn Rate

Raise NPS from 12 to 16+

Internal Processes

Strengthen Fraud Detection & Compliance

Reduce Avg Support Resolution Time

Accelerate Product Release Cycles

Learning and Growth

Build Regulatory Expertise in New Markets

Develop Data and AI Capabilities

Reduced Regretted Attrition

Three Causal Chains help reach the strategy objectives of Revolut

Talent → Support → Trust → Revenue

Reduced Attrition → Experienced Staff Stay → Better Support → Higher NPS/Low Churn → Higher LTV/Revenue

AI → More Products → Better Services

AI Capabilities → Faster Product Updates → Better Customer Coverage → Higher ARPU

Expertise → Compliance → Trust → Margin

Regulatory Expertise → Better Compliance → Customer Trust and Reduced Churn → Less Re-CAC → Higher Profits

Trade-Offs to Manage

Better Customer Support → More Staff → Reduced Margins = **Need Customer Centric Outlook**

Faster Shipping Speed → Compliance Risks = **Compliance is Key**

Reduced Attrition → Lower Workplace Stress → Reduced Shipping Speed = **Reduce Myopia**

Business Scorecard for Revolut

	Strategic Objective	KPI	Type	Baseline	Target
Financial	Grow recurring revenue	Total Group Revenue	Lagging	£3.1bn (2024)	£5.5bn
	Deepen monetisation	Revenue per User/Month	Lagging	~£5	£12
Customer	Become primary bank	% Users with 3+ active products	Leading	~20%	40%
	Improve customer trust	NPS Score	Leading/Lagging	~12	16+
	Retain customers	Monthly Churn Rate	Lagging	~1.5-2%	<1%
Internal Processes	Improve support quality	Median First Response Time	Leading	~6-12 hours	<1 hour
	Strengthen compliance	False-Positive Freeze Rate	Leading	~2-3%	<0.5%
CSR Dimension is included both implicitly and explicitly in Learning & Growth		Carbon Emissions per £1m Revenue (–30%)	% Women in Engineering (target: 30%)	NPS and Profit Margin are implicitly affected by ~20% taken in consideration	
	Build AI competency	% Engineers certified ML/AI	Leading	~15%	35%

Implementation and Control Issues

Challenge labels	Implication for Management Control		
Linking BSC to incentives	● If bonuses overweight financial KPIs, managers will under-invest in customers, processes, and learning. ● Needs role-specific weighting across perspectives and a discretionary component for behaviours not in the metrics.		
Cause-effect uncertainty	● Strategy-map arrows are hypotheses; better NPS may not always translate into lower churn. ● Requires ongoing review of data and willingness to revise KPIs, targets, and even causal links		
Measurement cost & gaming	● Sophisticated indicators require advanced data systems and clean definitions. ● Teams may game metrics; pairing KPIs in tension (e.g. fraud losses vs. false positives) & audits is essential.		
Top-management commitment	● L&D investments can take 1-2 yrs to appear in financials, creating pressure to revert to short-term financial control. ● Needs explicit sponsorship from the CEO/CFO and multi-year incentive plans aligned with BSC targets.		
Keeping the BSC “alive”	● Risk that the BSC becomes a static reporting template reviewed once a year. ● Should be integrated into monthly performance dialogues, with quarterly deep dives to test assumptions and re-prioritise initiatives.		
Implementation Takeaways	Design incentives	Pair KPIs in tension (e.g., growth vs. risk) and audit data to reduce gaming.	Institutionalise monthly BSC reviews and quarterly strategy deep-dives
	balancing all four sections of BSC over multiple years.		

Thank you.
